

INSULATION BODY COVER FOR IBC CONTAINERS WITH CASING OF NYLON

Properties

The standard insulation body cover in stock is used to insulate and maintain the temperature inside a standard 1000 litre intermediate bulk container – IBC.

The design allows using it in conjunction with an IBC container heater attached to the container underneath the cover.

If an even faster heating process is required, a silicone base heater and top cover/lid could be added.

The insulation cover is made of quality nylon material making it water repellent and fitted with quick release webbing straps to ensure easy attachment.

Technical specification

Material	Water repellent casing of quality nylon
Container size	1000 litre standard size container of brand Schüts, Mauser, GNX,
Dimension	4400x1000 mm
Assembly	Adjustable quick release buckles

Standard assortment
