

PROTECTION COVER FOR IBC CONTAINERS WITH CASING OF PVC

Properties

The standard waterproof protection cover in stock is used to insulate and maintain the temperature inside a standard 1000 litre intermediate bulk container – IBC.

The design allows using it in conjunction with an IBC container heater attached to the container underneath the cover i.e. it's possible to safely heat content in the container even in wet weather or in moist conditions.

The insulation cover is made of durable PVC plastic with welded seams making it waterproof. The full size cover has no openings
