

TOP COVER FOR IBC CONTAINERS WITH CASING OF TEFLON COATED CONDURA

Properties

The standard top cover/lid in stock is universal and fits any standard 1000 liters IBC container.

The cover can be used together with a container heater or insulation bodycover and will then minimize heating loss and support faster heating or maintain temperature for a longer period.

The top cover is made of durable Cordura material with Teflon coating making it resistant to chemicals and has a higher degree of water repellence, it's fitted with a strategically Velcro pad for easy attachment.
